| Securiclad         | 20 |
| Thermatrix         | 21 |

Pierhead, Senedd and  
Wales Millennium Centre, Cardiff Bay

Wales is a self-governing constituent country of the UK and the Welsh Government is the devolved Government for Wales.

Devolved since 1999, the Welsh Government's decision-making powers within a small and joined-up country mean we can cut red-tape and act fast.

They also mean we are responsible for our own economic development, working with business to create a prosperous, green and equal economy.

Wales has a strong industrial heritage that has shaped our confident, creative and ambitious economy of today. We have strength in depth in advanced manufacturing, creative industries, energy and environment, financial and professional services, food and drink, life sciences, and technology.

Our commitment to sell Wales to the world has never been more focussed and this mission provides an ideal platform for us to build on established links and discuss future export opportunities.

Wales means business.

**Balsamee** is a digital healthcare platform specifically focussed on developing tools and IT solutions that support the delivery of health care services in the community wherever the patient is located. Balsamee specialises in sourcing medical services and empowering both the patient and the medical service provider to facilitate healthcare services catering to patients' needs.

Access to quality care is limited and costly for people living in rural areas and developing countries, thus impacting their health and wellbeing. Moreover, there is currently no effective means for people travelling abroad who need care to efficiently identify and reach the services they need.

Balsamee's innovative integrated platform allows patients to remotely find the right services, book appointments and consult with specialists leading to a more cost-effective way of accessing higher quality healthcare services.

In the Arab Health 2023, Balsamee will introduce its newly launched healthcare loyalty system Be-Well-Pros with its unique network of providers and over 2 million users.

Balsamee's Healthcare Ecosystem is:

1. Powered by the proper ICT tools to reach enhanced care within the community.
2. Empowering service providers, users, their families and caregivers.
3. Capitalising on successful models of therapy in the community by delivering care to the patient at their point-of-care.

We believe that our innovative integrated platform allows patients to remotely find the right services, book appointments and consult with specialists leading to a more cost-effective way of accessing higher quality healthcare services.

## Product/Service

Balsamee products cover the supply, implementation and management of the following health IT solutions:

- On demand doctor
  - Request nearby service
  - Call doctor for a home visit
- Cross Borders Treatment (Medical Tourism)
- Balsamee Portal PMR (Patient Medical Records)
- Balsamee CRM solution For HealthCare
- Picture Archiving and Communication Systems (PACS)
- Radiology Information Systems (RIS)
- Cloud Computer Aided Detection (CAD) solution for breast cancer
- Clinics Information and reservation system
- Mobile Applications
  - Balsamee Mobile Application for doctors
  - Balsamee Mobile Application for users

**Ihab ElFouly**  
CEO

+44 (0)7446 512 651  
ihab.fouly@balsamee.co.uk

[www.balsamee.com](http://www.balsamee.com)

- Pregnancy
- Diabetes
- Blood donation
- Vaccination
- Occupational Health Enterprise Solutions
- Screening Solutions
- WorkFlow Management Solutions

Future road map solutions under Balsamee:

- Community Intensive Therapy Team (CITT) child psychiatry solution for CAMHS (Child and Adolescent Mental Health Services)

## Objectives

Balsamee seeks to appoint representatives and build strategic partnerships in the Arab world especially GCC, Levant and North Africa. Balsamee also focuses on the wider African market and hope to build partnerships around those promising markets.

For over 40 years, **Dulas** has been a pioneer in renewable energy. Their mission is to develop and implement renewable energy solutions that improve lives, help to combat climate change, and support communities in the most rural parts of the world.

One of the many innovative products developed by Dulas is the solar powered vaccine refrigerator which is manufactured in the UK. Their range of cold chain products support vital immunisation programmes and exceed the stringent World Health Organisation PQS standards, meaning their customers can rely on their performance, quality and safety. Dulas products help ensure that vaccines are accessible to all – no matter how remote their locations.

All Dulas refrigerators now have integrated remote temperature monitoring capabilities, allowing end-users to monitor the internal temperatures of their refrigerators from anywhere in the world, this is a crucial additional feature that assists in-country immunisation programmes.

### Objectives

- Meet key clients and new customers from across the region
- Meet with current distributors and search for new international distributors
- Raise Dulas's brand profile within the global market

- Increase awareness of Dulas's innovative products and services
- Showcase the new 'Beyond Ready' smart vaccine refrigerators with integrated remote temperature monitoring.

**Eakin Surgical** (formerly Single Use Surgical), was founded twenty years ago in response to the challenges faced when cleaning surgical instruments.

Hospitals identified that difficulty in cleaning surgical fine lumen suctions created a high risk of patient-to-patient cross-infection. Extensive consultation with hospitals and clinicians has led Eakin Surgical to develop a wide range of single use suction tubes and other surgical equipment. The instrument design aims to match the high quality, ease of use and functionality of the reusable equivalent, and is guaranteed clean and sterile whilst delivering cost and efficiency savings. The company's mission is to enable safer operations and improved patient outcomes through provision of high-quality surgical solutions. We work closely with healthcare professionals to identify improvements to products and bring new solutions to market. Today, Eakin Surgical are part of Eakin Healthcare Group est.1974, to provide innovative products that focus on offering a better patient experience. The Group still works with this goal at its heart, and now with extensive experience of manufacturing and supplying medical products to the healthcare industry. Group vision is always to put safety first, while providing sustainable outcome-led solutions for operating rooms worldwide that address modern healthcare challenges.

### Product/Service

Suctions, Smoke Evacuation, Pulse Lavage, Metal Instruments, Forceps,

Retractors, Rongeurs, Suction irrigation, Cannulas, Needles

### Objectives

- To meet with current distributors and search for new international distributors
- Increase brand awareness within the global market
- Grow our worldwide presence
- Identify potential new products

Breathing Innovation into lung health, wellness and wealth. Through Collaboration and Innovation – **Respiratory Innovation Wales (RIW)** is aiming to be a world leading gateway providing a range of professional services to NHS, Academia, and Industry.

Respiratory disease covers a large, diverse range of mainly incurable conditions including chronic obstructive pulmonary disease (COPD), asthma, bronchiectasis, cystic fibrosis, and lung cancer. Finding ways in preventing respiratory disease, managing, and treating it more effectively, could bring about substantial benefits to health outcomes and reduce economic burden.

We aim to:

- Enhance and develop respiratory products, services, and treatments.
- Seek real world insights through advanced data science and digital engineering.
- Expand our research and innovation activities.

Our specialist team, of practising clinicians, researchers and technical staff can provide a range of bespoke services tailored to your needs.

### Product/Service

If you are:

- Looking to enhance your respiratory products, services, or treatments
- Seeking real world insights to benefit your innovations and developments
- Conducting research that requires collaboration with other organisations
- Needing support for implementing and delivering multi-site trials
- Service development and health education packages

Then RIW can help.

Our approach ensures that our services are tailored to meet your specific needs. Examples of some of our current and most recent projects include:

- **SMART Housing** – building a more sustainable future. RIW are proposing a disruptive approach to defining SMART housing, as the lack

of definition and a tendency for reliance on well-established technologies is causing lots of confusion and is being seen as a hinderance to its development. RIW believes that living smarter is living better, and this concept should be the core descriptor in the definition of the SMART housing. A project to co-create and build SMART, net zero, sustainable and intelligent dwellings achieved through collaboration on a regional, national and international basis through advanced physical and digital engineering. Developing an infrastructure and state of the art manufacturing capability to improve the health, wellness and wealth of Wales.

- Mobile Respiratory Unit** — Respiratory Innovation Wales in collaboration with Cwm Taf Morgannwg University Health Board, Hywel Da University Health Board and Life Sciences Hub Wales have brought together a mobile unit to address the shortfall within community services and provide increased access to respiratory diagnostics. The unit has reduced the backlog of spirometry referrals by over 1000 patients in the last 6 months, helping the NHS backlog due to COVID-19. The Mobile Unit offers an innovative, timely, equitable, and accessible service for patients closer to home, representing a major initiative for planned care recovery in Wales.
- Oriel 3D** — A collaborative project between RIW, CTMUHB and WIDI in developing an online repository for 3D printable designs and product risk files to enable NHS hospitals to rapidly print suitable medical device parts and anatomical model.

—**ARIA** — Chronic disease can often alter breathing and speech patterns. Subtle changes in patients with raised physiological stress, exercise or speech might not at first be apparent. ARIA-TRE uses the power of artificial intelligence to aid detection of clinically relevant information that might previously have been undetected.

---

### Objectives

---

We believe that in RIW we have the opportunity to translate good ideas into products and approaches that will improve the respiratory health and well-being in Wales and beyond.

**Ruth Lee** is an established and successful family business with strong core values, nestled in picturesque North Wales, in the United Kingdom.

Over the last 30 years we have established ourselves as the world's leading manufacturer and provider of life-like manikins & training aids, used by rescue training experts in over 40 countries across the globe. Our key customers include Fire & Rescue Services, Paramedics, Ministry of Defence, Airports, National Lifeboat Institutions & Coastguards, Offshore operators, Health & Safety Officers, Care Home workers, and a multitude of International Search & Rescue organisations.

The Ruth Lee brand is both trusted and highly sought after by our customers. We place significant emphasis on product quality, durability and realism. Each manikin is weighted proportionally to accurately represent conscious or unconscious casualties. The manikins come in a range of weights and sizes, from 5KG to 260KG, and from babies to adults (1.65m or 1.80m).

### Product/Service

We offer a wide range of products to suit different training exercises. Common applications include, Firehouse Rescue, Vehicle Extrication,

Man-Overboard, Water Rescue, Working-at-Height & Confined Space rescue, Patient Handling, Casualty Evacuation, Body Recovery, Urban Search and Rescue and Mass Casualty.

**SurgiNovi** provides cost-effective solutions for orthopaedic surgeries. From their headquarters near Cardiff (UK), SurgiNovi integrates diverse skills from orthopaedists, scientists, engineers, researchers, and software specialists.

### Product/Service

They provide innovative and highly effective solutions for the following treatment areas:

- Patient Specific Instruments for Total and Partial Knee, Total Hip, Total Shoulder, High Tibial Osteotomy, Spinal Pedicle Screw insertion, and benign Tumour Removal procedures plus guides for multiple trauma fracture and malunion fixation.
- Custom-made Implants including Hip Spacers used for infected Total Hip Revisions.
- Preoperative Planning Software.
- 3D Printing Technology.
- Joint Replacement Modelling.

### Objectives

SurgiNovi's high quality work is recognised by numerous awards, publications, and patents, with continued investment achieving cutting-edge medical technology. Their Cairo office provides dedicated support for Middle East and African customers.

SurgiNovi is now looking to develop and grow its international distribution

network by appointing more dedicated Partners, Distributors and Agents throughout the world with the emphasis on the Middle East and Africa. Comprehensive Sales and Marketing support will be provided including in-theatre training by expert surgeons.

Creating secure environments, **Securiclad** provides an effective modular panel system with Government approved protection for high-risk areas.

Securiclad works across a broad spectrum of sectors, specialising in data centres, Government infrastructure, airports, healthcare facilities, universities, banks, cargo facilities and private residential clients, all requiring a security solution for high value assets ranging from currencies, hazardous materials, pharmaceutical products, IT infrastructure and much more.

With over four decades of technical experience, quality assurance and innovation, Securiclad's team of experts advise and guide customers through the purchase from design and project management to the installation process.

Having worked alongside contractors of all sizes on sites around the globe, Securiclad ensures project alignment, quality products and a precise certified installation which is recognised as an industry leading security solution.

### Product/Service

Securiclad panels are insulated modular panels designed with an anti-cutting core certified to LPS1175 standards SR2-SR5. Securiclad panels can be tailored in thickness and anti-cutting core depending on the

level of asset protection required. The panel is made up layers of galvanised steel and plywood surrounded by a core of either stone wool for fire-rated applications or PIR for thermally and acoustic efficient applications.

### Objectives

- To establish a strong export market in the UAE
- To make contacts with security experts, contractors and installation companies in the region

**Thermetrix** is an early growth staged medical device manufacturer. We are certified to ISO13485 and have a very experienced management team. Our main drive is helping people with diabetes, hence our strapline “Scan feet, Save Limbs, Save Lives”.

---

### Product/Service

Our primary product is a thermal foot monitor ‘Podium’ which helps clinicians diagnose foot health issues at an early stage.

Podium’s primary application is to identify foot ulcers (DFU) in people with diabetes before they occur.

Our trialists and customers have reported back that the unique thermal imaging also helps identify other pathologies such as acute Charcot’s, musculoskeletal trauma (MSK), neuropathic foot, microangiopathy, macroangiopathic foot, peripheral arterial disease (PAD) and Raynaud’s. Podium is a medical device (class I) that is used by clinicians.

The podium system comprises of a controlling tablet, thermal foot monitor and cloud-based portal for historical scan analysis.

---

### Objectives

Our key objectives for the visit are:

- Meet potential investors.
- Meet potential distribution partners from around the world (with a particular focus on the Middle East).
- Sell some podium systems.
